

## **Interfit tire service solutions show waste management industry ways to meet environmental challenges at IFAT 2024**

- **Interfit, leading service providers for material handling and construction tires, will help professionals upgrade operations at Hall C5 / Stand 526**
- **Interfit experts will show comprehensive range of tire services designed to meet daily demands of modern worksites with peak performance**

Interfit, the world's leading provider of industrial tire and wheel solutions will showcase its advanced tire services for optimal waste management operations at IFAT 2024, one of the most prestigious events in the environmental technology sector, taking place May 13-17 in Munich, Germany.

Interfit experts will show professionals how tire innovation and service excellence can help improve their business through precision tire management geared toward more sustainable operations, starting with the careful selection and servicing of the right tire and wheel solutions for the job at hand.

"We are excited to showcase our advanced tire service solutions at IFAT 2024," states Anton Stoynev, Director Material Handling & Construction Central Europe. "As a trusted partner of the construction and waste management industries, Interfit once again shows its solid commitment to customers worldwide, providing tailor-made services that address their challenges head-on. Our comprehensive range of cutting-edge solutions is designed to maximize machinery performance and tire endurance, even in the most demanding environments."

Today's waste management companies face myriad challenges and environmental concerns that demand innovative solutions. From rigorous worksites to tight deadlines, professionals are constantly seeking ways to enhance the performance and reliability of their machinery. As a result, the need for high-performance tires has never been greater.

**Custom-designed services:** At Interfit Stand 526 / Hall C5, professionals will discover tire service solutions designed to improve their business, including expert tire selection and on-site servicing, accurate changeovers and machinery transformation, and a complete wheels offer and exchange services that ensure optimal efficiency with less downtime.

**Expert Consultation:** Interfit's team of tire specialists will be on site to provide expert guidance and personalized recommendations to help waste professionals optimize their tire management
